

## Fiscal Year PREA Investigations Report 10/01/2015 – 10/01/2016

---

PREA standard 115.88 and 115.89 require Williamsburg County Detention Center to make available to the public a yearly report of corrective actions and our agency's progress in addressing sexual abuse.

This is the first year that Williamsburg County Detention Center has collected this data and began implementing the Prison Rape Elimination Act, as most jails and prisons in SC are starting to also do. We have made strides this year in educating our staff, contractors, volunteers and inmates and our communities.

Once an allegation has been investigated and concluded to have occurred, we have an incident review team that meets to discuss what we can do differently to ensure an incident of this nature does not happen again.

Below is a list of substantiated allegations since October of 2015. Names are not listed for confidentiality reasons.

Date	Allegation	Place	Outcome	Corrective Action
N/A	N/A	N/A	N/A	N/A

In cases that are substantiated, the victim and suspect are offered counseling at no cost to them, if they chose to partake. The Victim is also offered a forensic medical evaluation (where applicable for evidentiary purposes). This is also offered at no cost to the victim.

At Williamsburg County Detention Center we are dedicated to serving our county and community with the utmost respect and we will investigate all allegations of sexual abuse and harassment whether it be inmate on inmate, or staff on inmate. We hold our officers to a high level of professionalism and Nadia Pressley, the Director of the Detention Center, has an open door policy with all of our staff and is always open to new ideas and listening to staff concerns.

We are currently taking applications for detention officers to help with continuing to maintain a high level of efficiency, professionalism as well as safety.
